HTML List Style Cheat Sheet

```
<ul class="classname">
    <li>Item one</li>
    <li>Another item</li>
</ul>
```

Any combination of styles is acceptable. For example:

```
<ul class="flat indent bullet-a">
    <li>Item one</li>
    <li>Another item</li>
</ul>
```

Default (no style)

- This is very useful for a a a list which are in fact paragraphs and contain a lot of text;
  - First item inside
  - Second item inside
- About the credit cards and mortage payments;
- Final item on the list.

spaced

- This is very useful for list items which are in fact paragraphs and contain a lot of text:
  - First item inside
  - Second item inside
- Next in here
- The final item
